

September 25th, 2012

To whom it may concern,

My name is Sally Mann and I have thirty five years of medical experience, five years as a Registered Technologist and thirty years as a Registered Diagnostic Medical Sonographer. I am Arthur Royter's supervisor here at Dekalb Medical in the Echo department. When Arthur first showed me the demonstration video of Diaperpods, I was truly impressed. It is such a simple and ingenious idea that I couldn't believe it hadn't already been invented.

Working in the hospital setting for as long as I have, I see an immediate value in the product. It's ability to contain unpleasant odors and impact the cleanliness of the environment. This product would be so welcome in the hospital setting by both families and healthcare professionals. I am not surprised that Arthur is involved in this great idea and company start up. He is a sharp, energetic, and cultured young man, I am certain that he and his team will be successful at launching Diaperpods, LLC. It is truly my pleasure to endorse this brilliant idea and future successful product.

Please feel free to contact me if you have any questions or if I can be of any assistance.

Sincerely,

Sally Mann, RDMS, RDCS
